

Keeping the Socializing Distant and The Israel Connections Close!
Israel Education Source Sheet
March 13, 2020

**Coronavirus has directed our focus on serious medical problems.
Let's redirect some focus on Israel's recent amazing medical advances!**

ApiFix system: corrects scoliosis, severe curvature of the spine, and minimizes risks, scar size, complications, recovery time and cost.

PillCam or capsule endoscopy, is now the gold standard for intestinal visualization.

ReWalk robotic exoskeleton, (featured on "Glee") enabled paraplegic runners in London and Tel Aviv to complete marathons. The ReWalk Rehabilitation model is used by patients in rehab centers from New York to Dusseldorf.

BioWeld1 bonds surgical incisions using cold plasma — instead of painful stitches, staples or glue — within minutes, sealing and disinfecting the wound with minimal scarring and recovery time.

Total Lift bed is the world's only hospital-grade bed that can elevate a patient from a lying to a fully standing position — and all points in between — for treatment and transfer with no lifting required of the caregiver.

Bio-Retina, a tiny implantable device inserted into the retina turns into an artificial retina that melds to the neurons in the eye. Activated by special eyeglasses, the device transforms natural light into an electrical impulse that stimulates neurons to send images to the brain and may restore lost site.
